

FOR IMMEDIATE RELEASE

Data Distributing LLC Selected by DISC Storage LLC as the Leading Distribution Partner to the US and Canadian Medical Market

Laguna Hills, California – January 17, 2006: Data Distributing LLC, a leading provider of broad range, cost effective, DICOM, media and mass-storage solutions and DISC Storage LLC, recognized as a leading innovative optical data storage supplier by a industry and commerce world wide, today announced a strategic partnership to distribute the DISC Blu-ray and NSM-DVD Series of storage technology products.

The partnership provides Data Distributing with the latest technology in disk archiving to store crucial medical images and records as per HIPAA guidelines. This alliance will also further advance DISC's desire to support their current US customer base as well as develop new business, specifically in the medical market of both the US and Canada.

Horst Schellong, President for DISC remarked, "We are excited with the prospects of this new partnership and value Data Distributing, as a leader and DISC's strategic partner in the medical archive solution market for the US and Canada. The range of optical storage products, offered by DISC, compliments the wide range of medical applications marketed by Data Distributing. The Blu-ray, BD-R and BD-Re libraries add highly competitive archive solutions which, together with the DVD library family, meet the wide range of archiving needs that HIPAA and DICOM guidelines demand. The DISC storage libraries are available with a capacity range from 1TB to 34TB. Through this partnership we now have the ability to give our customers added value, focus, and the perfect fit needed for a competitive advantage"

"Data Distributing has an excellent track record providing leading edge DVD-R library solutions for critical archiving applications to the medical market. Our valued customers have been demanding next generation WORM optical technology with larger density, lower cost per GB and higher transfer speeds, yet backwards compatible to DVD-R. Blue Ray Library solutions from DISC fit this requirement perfectly," said Nancy Fisher, President and CEO of Data Distributing."

Data Distributing will represent the DISC1000, DISC3000, DISC4000 and DISC7000 product lines as part of their vast selection of digital solutions for the medical imaging and business industries. Additional information may be found on the Data Distributing website at www.datadistributing.com.
